

J - Jump.

Syntax:

JM/message/	Jump Message
JP/message/	Jump Prompt
JE/message/	Jump Exit
JOT	Jump Out if true
JOE	Jump out if false
JBT	Jump Break if true
JBF	Jump Break if false
J(label)	Jump to label
J(label)T	Jump to label if true
J(label)F	Jump to label if false
JT	Skip rest of line if true
JF	Skip rest of line if false

Examples:

```
jm/Hello there/  
jp/Do you want a manual (yes or no)?/  
je;Ending execution;  
jot  
jbf  
jb  
j(label)  
jt "commands"
```

Description:

The Jump commands are used to "jump" over commands, to transfer control from one buffer to another, and to print messages to the terminal.
